Education

Mata Rajkaur Institute of Engineering and Technology   Oct. 2021 – Sep. 2025
Bachelor of Technology in Computer Science and Engineering   *Rewari, Haryana*

Relevant Coursework

- Frontend Development
- Web Development
- Data Structures
- Computer Networks
- Software Development Engineering

Experience

Prasunet Company | Link   June 2024 – July 2024
Web Development Intern   *Rewari, Haryana*

- Gained hands-on experience in DOM manipulation and Vanilla JavaScript, effectively enhancing interactive web applications.
- Mastered Asynchronous JavaScript, improving performance and responsiveness in web projects.
- Authored 5000+ lines of code across multiple tasks, demonstrating strong problem-solving skills and attention to detail.
- Consistently delivered projects before deadlines, showcasing excellent time management and the ability to work under pressure.

Projects

Expense Tracker | *Reactjs, Css, Javascript / Link*   August 2024

- Developed an Expense Tracker using React.js, demonstrating foundational knowledge in component-based architecture.
- Integrated core React features like state management and props to handle user inputs and dynamically update the UI.
- Deployed the application on Vercel, gaining experience in deployment and continuous integration.
- Successfully completed the project as part of my early journey in learning React.js, showcasing a quick learning curve and eagerness to apply new skills.

Desktop Music Player App | *Vanilla Javascript / Link*   June 2024

- Developed a Desktop Music Player with key features including playlist management, artist listings, and shuffle playback, enhancing user experience through a comprehensive music library.
- Implemented core functionalities like play/pause controls, download options, and an interactive sound bar for volume adjustment.
- Utilized Vanilla JavaScript to manage UI interactions and audio processing, demonstrating strong foundational programming skills.

News Application | *Html, Css, Javascript / Link*   July 2024

- Developed a News Application with API integration, allowing users to search and explore various news topics through a responsive search bar.
- Implemented a card-based layout to dynamically display news articles, including images, headings, and descriptions, enhancing the visual appeal and user engagement.
- Ensured the application was fully responsive, providing an optimal user experience across different devices and screen sizes.
- Successfully combined API data handling with modern web design principles, demonstrating proficiency in both frontend development and API integration.

Technical Skills

Languages: *Html, Css, Javascript, Python*
Developer Tools: *VS Code, Pycharm, Eclipse*
Technologies/Frameworks/Library: *Reactjs, Tkinter, Graph.js*

Achievement / Extracurricular

Letter of Recommendation   July 2024
                    Prasunet Company

- Received a Letter of Recommendation (LOR) from company for outstanding performance during a Web Development Internship, highlighting proficiency in JavaScript, project management, and timely delivery of tasks.
